

# Software Engineer - 2019

Do you want to work for one of the biggest consulting companies in Spain, working more than 12 hours a day and not having a life? We don't either. So come and be part of a cool worldwide company, building things that matter to a real business, learning and making an impact while also enjoying your life.

We are growing again! At mediasmart we are looking for a software engineer to join our team, whose main function will be to develop for the main products we offer to users: the web frontend and the API.

## Responsibilities

- Deliver new features in short development cycles.
- Polish a web-based platform with users all over the world.
- Proactively improve and propose projects to make our product more effective and easy to use.
- Interact with other teams to build new features or solve technical issues.

## Skills

Core skills & knowledge:

- Proactivity
- Good communication skills, oral and written
- Good knowledge of Javascript and ES6
- Experience with modern frontend frameworks
- Basic knowledge of CSS stylesheets (SASS, PostCSS, etc.)
- Node.js and REST APIs
- Basic knowledge of SQL and NoSQL databases
- Experience with Git
- Basic GNU/Linux administration
- Fluency in English

Nice to have:

- Experience working in a distributed team
- A good eye for design
- React
- MongoDB
- Redis
- AWS

Experience:

- At least 2-4 years of experience in a similar position or using similar technology

## What we offer

- Competitive salary
- Flexible hours and optional remote work
- To be part of a small team with direct impact in the final product
- Using state of the art technologies
- Educational resources
- Creative Fridays: One day every two weeks to work on your own ideas

## How to apply

Apply to [jobs@mediasmart.io](mailto:jobs@mediasmart.io) with “*Software Engineer 2019*” in the subject, including:

- Links to personal projects (or to your GitHub account),
- Up-to-date resume (can be a link to LinkedIn or similar),

Or you can use [this form](#).

If you are selected you will have to be ready to show us your most relevant projects, and enter a selection process that will include reading and writing JavaScript code.

## About mediasmart

mediasmart is the first Spanish company working on the real time optimisation of mobile advertising, using its proprietary technology platform and focused on ethics and transparency.

mediasmart was one of the first movers into the mobile programmatic ecosystem, having launched in Jan 2012. It's platform gives access to global mobile inventory –both in mobile apps and web– from more than twenty seven ad exchanges/SSPs, and it has successfully proven throughout the years that its algorithms can effectively manage big data to deliver results. A proven and scalable technology, currently handling more than 900,000 ad requests per second, mediasmart can be used directly by clients on a self-serve basis or via APIs, and it handles both RTB and programmatic direct buys.

With offices in Madrid, London and Paris, mediasmart includes a team of mobile and advertising experts, and is backed by well-known investors Kibo Ventures (Aquilino Peña), KOMM Investment (Michael Kleindl) and Inveready.
